

Call for papers

Sports Psychiatry (Journal of Sports and Exercise Psychiatry)

Special issue on “Mental Health in Elite and High-performance sports”

We are soliciting manuscripts for inclusion in the issue of *Sports Psychiatry – Journal of Sports and Exercise Psychiatry* titled, “**Mental Health in Elite and High-performance sports.**” We welcome conceptual or empirical manuscripts with an international focus on the topic. This can include review articles, meta-analyses, consensus statements, full original research reports, or brief communications, in keeping with the usual article types for *Sports Psychiatry*.

The issue will focus on the following topics:

Topics of interest for this special section include, but are not limited to:

- Studies that examine manifestations, prevalence, and incidence of mental health and substance use disorders in elite and high-performance sports
- Studies focused on psychiatric treatment, including psychological and pharmacological treatment, of athletes in elite and high-performance sports
- Studies analyzing the impact of social determinants, particularly related to structural variables, such as gender, race, sexual orientation, etc., on mental health of athletes in elite and high-performance sports
- Studies that examine and/or compare implementation strategies of evidence-based practices for mental health and substance use disorders at the healthcare system
- Studies that examine mental health related policy dissemination and implementation at local, state, and national levels regarding athletes in elite and high-performance sports
- Studies that examine how best to disseminate and implement effective sports psychiatry interventions, including psychological and pharmacological interventions, for athletes in elite and high-performance sports in healthcare system and community settings

Article types:

- Original research, abstract max. 250 words; article max. 3000 words; max. 60 references; max. 6 fig./tab.
- Reviews / meta-analyses, abstract max. 250 words; article max. 4000 words; max. 80 references; max. 6 fig./tab.
- Letter to the editor / commentaries, max. 1000 words; max. 10 references; max. 1 fig./tab.
- Consensus statements, Position papers, scope, only after prior editorial board approval

Article-processing charges (APC):

All articles published in *Sports Psychiatry* are open access and freely available online, immediately upon publication. In order to cover the costs of publishing the journal, including those of manuscript submission and peer review management, journal production, online hosting and archiving, liaison with abstracting and indexing services, as well as online distribution and data feeds to libraries, discovery services, content aggregators, and other information services, an article publication charge (APC) must be paid. Price details are provided in the open access order form.

In addition, as detailed in the waiver policy and application form, Hogrefe is currently offering a generous waiver program for eligible authors. Eligible papers shall include papers by authors who do not have access to publication fee grants or funding, papers by authors who are not employed or funded by commercial organizations, and other papers as may from time to time be agreed by Hogrefe.

Approximate Timeline for Submissions:

Authors are invited to submit a full manuscript due **January 15, 2022**. An optional letter of intent should be emailed to andres.schneeberger@pdgr.ch by **October 15, 2021**. All manuscripts will be subject to full editorial board and peer review. We anticipate that the issue will be published in Spring 2022.
